

The Fair Future Foundation Ethical Charter

Because Healthcare is a Basic Human Right

Dear Madam, dear Sir, dear friends,

The following Charter establishes the foundations' existence, their values' meaning, **their base philosophy** and de facto, their **mission** and prime **objectives**.

1. The **Fair Future Foundation** and the **Bali Sari Foundation** operate in **disease prevention, medical and health care, education and professional** integration towards children, teenagers and young adults. The foundations assist them in recovering their autonomy to **build their future**, in respect of **affective and social** specificities and of their living environment;
 - 1.1. Our foundations operate **in total respect** of the operating country's **beliefs, traditions, customs and religions**;
 - 1.2. Our foundations ethos **excludes** any denominational or **ethnic discrimination**. Furthermore, they are strictly **not politically affiliated**.
 - 1.3. Our foundations **commitment** is to build **sustainably**, without any kind of **condescendence** towards local population, nor the already existing initiatives.
2. We consider that
 - 2.1. In regard of our societies development, of the global information media access and of the goodwill of those fighting for social progress, **health, medical care and education should not be any longer an hindrance** to the fulfilment of tomorrow's society;
 - 2.2. Hence our foundations make it a priority **to develop solutions** for one or several issues, in order to reduce the areas **where health & medical care**, only exist today in glimpses of hope and this, **in respect of the communities** and each of **their members**;
 - 2.3. **Respect, tenderness, simplicity, care and action** are values which will be joined by **any positive influence** assisting the area, a sector or a matter of interest which we are engaged with in relieving it from its deficiencies;

Our foundations can fulfill such actions through the actions of **voluntary people**, which first motivation is to fight **underprivileged childhood and lack of healthcare**.

Those men and women can testify about what they freely experience and witness, so they can testify **in favor of humanity**.

Alexandre Wettstein - Foundation Board President - March 2012
